ARTICLE BEGINNING

1990-91 WHEEL ALIGNMENT
Specifications & Procedures

1990-91 Passat
1991 Cabriolet, Corrado, Fox, Golf, GTI, Jetta, Vanagon

PRE-ALIGNMENT INSTRUCTIONS

NOTE: Prior to performing wheel alignment, perform preliminary visual and mechanical inspection of wheels, tires and suspension components. See ALIGNMENT THEORY/OPERATION in the WHEEL ALIGNMENT Section.

RIDING HEIGHT ADJUSTMENT

NOTE: On vehicles with electronic chassis controls, all systems should be functional before attempting riding height or wheel alignment adjustment.

Before adjusting alignment, ensure difference in riding height between left and right sides of vehicle is less than 1" (25.4 mm). Riding height must be checked with vehicle on level floor and tires properly inflated. Bounce vehicle several times and allow suspension to settle.

Visually inspect vehicle for signs of abnormal height from front to rear or side to side. Check passenger and luggage compartments for extra heavy items and remove if present. If difference in riding height between left and right sides of vehicle is NOT less than 1" (25.4 mm), check suspension components and repair or replace as necessary.

WHEEL ALIGNMENT SPECIFICATIONS

WHEEL ALIGNMENT SPECIFICATIONS TABLE

AA

Application	Preferred	Range
-------------	-----------	-------

Cabriolet

Camber (1)

Front 5/16 -3/16 To 13/16
-------	------------	----------------------
